Using the words of our four greatest presidents, its purpose is to equip citizens and leaders to build a bold new future, avoiding a collapse into authoritarian darkness. The Rushmore Strategy outlines how we can win the battle between good and evil unfolding in 2024 and beyond.

Architecting a Democracy that Works: Rushmore Wisdom for Modern Times

America stands at an ominous crossroads. Authoritarians, in their unconscionable thirst for power, are dividing our nation, polarizing our people. Trust in core institutions has cratered, while polarization tears communities apart, leaving democracy imperiled. Angry citizens grasp for simplistic solutions pitched by digital demagogues and conspiracy mongers. Negativity and cynicism reigns, as reason itself faces assault amid truth decay. Our youth are despondent, seeing little hope for their future.

Yet glimmers of Hope Persist and an Action Plan Emerges in Rediscovered Wisdom

The Rushmore Strategy charts a bold path forward by channeling advice from the nation's most revered presidents. Washington, Jefferson, Lincoln and Roosevelt offer foundational insights to renew democratic vision, collaborative unity and engaged citizenship. Their leadership legacies point the way out of gathering darkness.

This timely book presents the architects of American promise prescribing strong medicine to cure current ills. Their prescription summons citizens to rediscover dignity, reason and moral purpose in service of democratic renewal. By championing timeless ideals the Rushmore presidents exemplified, Americans can write a proud new chapter.

The Rushmore Strategy's central mission is reviving the lost spirit of 1776 - the enlightened quest for collaborative self-governance securing life, liberty and the pursuit of happiness.

Its purpose is outlining practical steps to increase participation, bridge divisions and restore confidence using methods already woven into the national DNA by visionary founders. Crucial reforms rebalance liberty and responsibility while upgrading civics and character education.

Can our cherished institutions be free, if we no longer trust their leaders? Freedom is not without a price – we, as citizens must recognize that *protecting our rights* also requires *shouldering our responsibilities* as citizens.

The Rushmore Strategy taps immortal wisdom from past exemplars guiding nation and citizen alike toward more perfect union, rising from turmoil stronger and more united than before. The founders' urgency persists through the ages. Heeding their call, Americans can author a story of darkness defeated - light triumphing over despair.

Now is the time for action. Washington, Jefferson, Lincoln, and Roosevelt have stated the case for Saving American Democracy; they await our choice.

Shall we preserve and protect our hard-earned liberties and freedoms with courage, compassion and creativity? Shall we be the orchestrators of an American renewal?

Or will indifference and cynicism yield a death-destined collapse of the vision they carved into Rushmore, leaving the American experiment as history's greatest human tragedy?

The decision is ours alone. The Rushmore Strategy illuminates the path onward and upward!
